

S-Band Radar Transistor

The high power pulsed radar transistor device part number IB3134M25 is designed for S-Band radar systems operating over the instantaneous bandwidth of 3.1-3.4 GHz. While operating in class C mode this common base device supplies a minimum of 25 watts of peak pulse power under the conditions of 300µs pulse width and 10% duty cycle. All devices are 100% screened for large signal RF parameters, including power gain compression. Excellent spectral stability into output mismatch over a broad input power range make it ideal for use in reliable high power solid state transmitters.

- Silicon Bipolar
 - Ultra-high f_T
- Class C Operation
 - High Efficiency
- Common Base Configuration
 - Single Power Supply
- Gold Metal
 - Maximum Reliability
- Emitter Ballasting
 - Optimum Thermal Distribution
- Internal Impedance Matching
 - Ease of Use
 - Ultra-low Loss Design
- BeO Package
 - Unmatched Thermal Reliability
- RF Test Fixture
 - Broadband
 - Matched to 50Ω
 - Long-term Correlation
 - 100% Device RF Screening
 - No External Tuning Allowed
- Insertion Phase Marking
 - 5° Increment Marking

DEFINITIONS

Data Sheet Status	
Proposed Specification	This data sheet contains proposed specifications.
Preliminary Specification	This data sheet contains specifications based on preliminary measurements and data.
Product Specification	This data sheet contains final product specifications.
Maximum Ratings	
Stress above one or more of the maximum ratings may cause permanent damage to the device. These are maximum ratings only and operation of the device at these or at any other conditions above those given in the characteristics sections of the specification is not implied. Exposure to maximum values for extended periods of time may affect device reliability.	

WARNING

Product and environmental safety - toxic materials
This product contains beryllium oxide. The product is entirely safe provided that the BeO base is not damaged. All persons who handle, use or dispose of this product should be aware of its nature and of the necessary safety precautions. After use, dispose of as chemical or special waste according to the regulations applying at the location of the user. It must never be thrown out with general or domestic waste.
